

## Article 29

**I have the right to an education which develops my personality, respect for others' rights and the environment.**

In order to preserve and maintain our environment for our children and future generations, we feel that there are little changes that we can make at Nursery.

We will be trying to use less energy by turning lights and unnecessary electricity off. We will also be moving away from using traditional baby wipes and ensuring that we use environmentally friendly, bio-degradable alternatives.

We would value your contribution to this. Please could you send in a packet of **bio-degradable wipes** or a voluntary contribution of £2.
